Response to Lines 500-510 - Service Quality Standards and Consumer Protection Rules

Compliance

In establishing this certification in its *2005 ETC Order*,¹ the FCC found that an ETC must make “a specific commitment to objective measures to protect consumers.”² The FCC found that for wireless ETCs, compliance with CTIA’s Consumer Code for Wireless Service would satisfy this requirement” and that the sufficiency of other commitments would be considered on a case-by-case basis.³ In this context, the FCC stated, “to the extent a wireline or wireless ETC applicant is subject to consumer protection obligations under state law, compliance with such laws may meet our requirement.”⁴

Central Arkansas Telephone Cooperative, Inc. (“Company”) hereby certifies that it complies with applicable service quality standards and consumer protection rules established by the Arkansas Public Service Commission and detailed in the Telecommunication Provider Rules. Specifically, sections 1.09, 1.10, 1.11, 1.12, and 2.0 address the following obligations which include, but are not limited to: 1.09 Service Availability, 1.10 Safe and Adequate Service, 1.11 Construction Standards, 1.12 Facility Identification and Section 2.0, which details consumer billing rules and regulations. Furthermore, Company is subject to cyclical compliance reviews by

¹ *Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, Report and Order, FCC 05-46 (rel. Mar. 17, 2005) (“*2005 ETC Order*”).

² *Id.* at para. 28.

³ *Id.* The FCC noted that under the CTIA Consumer Code, wireless carriers agree to: “(1) disclose rates and terms of service to customers; (2) make available maps showing where service is generally available; (3) provide contract terms to customers and confirm changes in service; (4) allow a trial period for new service; (5) provide specific disclosures in advertising; (6) separately identify carrier charges from taxes on billing statements; (7) provide customers the right to terminate service for changes to contract terms; (8) provide ready access to customer service; (9) promptly respond to consumer inquiries and complaints received from government agencies; and (10) abide by policies for protection of consumer privacy.” *Id.* at n. 71.

the Arkansas Public Service Commission Telecommunications Utilities and Quality of Service Section.

In addition, the Company complies with numerous federal consumer protection standards including, but not limited to: (1) Truth-in-Billing Rules outlined in 47 CFR § 64.2401; and (2) compliance with Federal CPNI rules, Red Flag Rules and other applicable federal and state requirements governing the protection of customers' privacy.

Furthermore, Southwest Arkansas Telephone Cooperative, Inc. hereby certifies it will apply the same service quality standards that it currently applies to Voice service to Broadband services also, as is applicable to 47CFR 54.313.(a)(5)

Central Arkansas Telephone Cooperative, Inc.

Response to Lines 600-610 - Ability to Function in Emergency Situations

Central Arkansas Telephone Cooperative, Inc. ("Company") hereby certifies that it is able to function in emergency situations as set forth in the Code of Federal Regulations, Title 47, Part 54, Subpart C, §54.202(a)(2)¹ and the Arkansas Public Service Commission Telecommunication Provider Rules. The Company's network is designed to remain functional in emergency situations without an external power source, is able to reroute traffic around damaged facilities, and is capable of managing traffic spikes resulting from emergency situations as required by Section 54.202(a)(2). The Company can change call routing translations as needed to reroute traffic around damaged facilities. Changing call routing translations also allows the Company to manage traffic spikes throughout its network, as emergency situations require.

Specifically, the Company is able to function under emergency operations in accordance with Arkansas Service Commission Telecommunication Rules §8 *General Service Standards*, §10 *Maintenance*, and §11 *Quality Standards* which include obligations for continuity of service and emergency operations planning and service provision capability for dominant carriers. Any central office without a permanently installed emergency power system shall be wired to permit connection of a mobile emergency power unit, and there shall be a mobile emergency power unit available for connection on short notice with minimum travel time. Furthermore in section

¹ Section 54.202(a)(2) requires ETCs that are designated by the Commission to "demonstrate its ability to remain functional in emergency situations, including a demonstration that it has a reasonable amount of back-up power to ensure functionality without an external power source, is able to reroute traffic around damaged facilities, and is capable of managing traffic spikes resulting from emergency situations."

11.06.B, each central office shall be equipped with a battery reserve sufficient to sustain operation until emergency power can be connected.

Furthermore, Central Arkansas Telephone Cooperative, Inc. hereby certifies it will apply the same standards as they relate to the ability to function in emergency situations that it currently applies to Voice service to Broadband services also, as is applicable to 47CFR 54.313.(a)(6)

Central Arkansas Telephone Cooperative, Inc.

Response to Lines 1000 - Voice Service Rate Comparability

Central Arkansas Telephone Cooperative, Inc. ("Company") hereby certifies it does not provide voice rates that are above two standard deviations above the national average urban rate. as set forth in the Code of Federal Regulations, Title 47, Part 54, Subpart C, §54.313(a)(10). Company determined this by comparing its rates to the National Average Urban Rate, which was recently released by the FCC. The rate of the Company is below the National Average Urban Rate and therefore the 2 standard deviations calculation does not apply.

Five-Year network Improvement Plan
For Central Arkansas Telephone Cooperative, Inc.

In its USF / ICC Transformation Order and subsequent Orders, the Federal Communications Commission ("FCC " or "Commission") requires Eligible Telecommunications Carriers ("ETCs") to submit a five-year build-out plan in a manner consistent with Section 54.202(a)(1)(ii) for the Commission's Rules by July 1, 2014 and to submit annual progress reports thereafter. Section 54.202(a)(1)(ii) states in part that ETCs are to submit a five-year plan that describes with specificity proposed improvements or upgrades to the ETC's network throughout its proposed service area. Each ETC shall estimate the area and population that will be served as a result of the improvements.

In its March 5, 2013 Order, the FCC specified that for rate-of-return carriers, the five-year plans " should describe the carrier's network improvement plan, which should provide greater visibility into current plans to extend broadband service to unserved locations in rate-of-return service territories". Central Arkansas Telephone Cooperative, Inc. ("CATC") is a rate-of-return carrier ETC and hereby submits its five-year network improvement plan.

I. The Challenges Faced by the Cooperative in Providing Voice and Broadband to its Rural Service Area

A. Description of the Company and its Service Area

Central Arkansas Telephone Cooperative's service area is located in southern Hot Spring County. CATC provides both voice and broadband to this areas. The serving area is very rural with extremely long loop lengths and low per subscriber per mile counts. The area is predominantly rural

with farming and pulpwood productions being the main sources of income. Hot Springs is the major commercial center for the area. CATC faces many challenges in providing services within its serving area, including a mountainous area to the north containing rock which can be difficult to place cable through and a railroad operating within its serving area. All of these factors, combined with the low population density, make construction complicated and expensive.

B. The Exchanges Contained Within the Company's Study Area

CATC owns and operates two (2) exchanges in central Arkansas. These exchanges are Bismarck and Donaldson.

II. The Company Has Used and Will Use Universal Service Support Only for the Intended Purpose

Section 254(e) of the Communications Act of 1934, as amended requires ETCs to use Universal Service Support ("USF") only for the provision, maintenance, and upgrading of facilities and services for which the support is intended. Pursuant to Section 54.314 of the FCC's rules, in order for state-designated ETCs to receive USF for the coming year, states must annually file certifications by October 1 stating that all federal high-cost support provided to such carriers within the state "was used in the preceding calendar year and will be used in the coming calendar year only for the provision, maintenance, and upgrading of facilities and services for which the support is intended." ETCs not designated by the state must file similar certifications with the FCC.

In its USF/ICC Transformation Order, the FCC clarified that prior to making the Section 254(e) certifications, states should conduct a "rigorous examination of the factual information" contained in the annual Section 54.313 reports, of which the

five year network improvement plan and annual progress reports are a part, in determining whether they can certify that carriers' support has been used and will be used only for the purpose for which the support was intended. The FCC said that it would also use the reports to verify certifications filed by ETCs that are not state-designated. In this context, the Commission stated, " in light of the public interest obligations we adopt in this Order, a key component of the Section 254(E) certification will now be that support is being used to maintain and extend modern networks capable of providing voice and broadband service.

Essentially, under the existing rules and processes, the federal USF received by the Company and other incumbent rural telephone companies are, in fact, an integral part of the recovery of expenditures of rural incumbent local exchange carriers incurred in the provision, maintenance and upgrading their provision of facilities and services for which the USF is intended. Central Arkansas Telephone Cooperative, Inc. depends upon its receipt and utilization of federal universal service support to provide rural telephone customers with affordable and quality voice and broadband services.

Accordingly, given the critical role the network improvement plan and the progress reports will have in the annual Section 254(e) certification process, Central Arkansas Telephone Cooperative, Inc.'s plan and progress reports will demonstrate not only how CATC has used and will use USF not only for improvements and upgrades, but also for the provision and maintenance of the facilities and services to which the support was intended.

III. The Company's Five-Year Network Improvement Plan

When the Commission adopted its five-year plan requirements for FCC designated ETCs in its 2005 ETC Order, it set forth the following criteria as to how the ETC is

to describe with "specificity" the proposed improvements or upgrades to the ETC's network throughout its service area:

(1) how signal quality, coverage, or capacity will improve due to the receipt of high-cost support throughout the area for which the ETC seeks designation; (2) the projected start date and completion date for each improvement and the estimated amount of investment for each project that is funded by high-cost support; (3) the specific geographic areas where the improvements will be made; and (4) the estimated population that will be served as a result of the improvements.

In that order, the FCC clarified that service quality improvements in the five-year plan "do not necessarily require additional construction of network facilities." Accordingly, the improvements listed in the plan may be projects related to the expansion of the network (one or multiple service), projects related to updating technology to accommodate new services or higher bandwidth or maintenance projects, such as to reduce trouble reports and replace outdated equipment. Additionally, in some cases, the projects may be ones that improve or upgrade the entire network rather than discrete areas within a study area or they may be ones that are ongoing projects that have no specific start and completion dates.

The instructions to the Form 481 state "recipients may describe where improvements are expected to occur by wire center or census block, as appropriate. To the extent no improvements are planned in specific areas, the five-year plan should so indicate." The instructions also require that in subsequent annual progress reports which must include the total amount of universal support received must provide this information "broken out separately by the amount spent on capital expenses and the amount spent on operating expenses."

Accordingly, the Company's five-year plan separately provides both capital expenditures and operating expenses.
